

Syed Sabeer

Backend Developer

Profile

I'm a dedicated software developer with 1.5 years of experience working with Laravel, building efficient and scalable web applications. Along the way, I've also gained solid experience with the MERN stack, Python, and Django. Currently, I'm diving into AI engineering to expand my skill set and work on smarter solutions. I love solving complex problems, learning new technologies, and pushing myself to build better software every day.

Employment History

Laravel Developer at SuperSoft Technologies

February 2024 — Present

Developed and maintained web applications using Laravel. Integrated payment gateways like Stripe, PayPal, and Authorize.Net. Worked with chat sockets for real-time communication. Optimized backend performance and built scalable RESTful APIs.

Laravel Developer at Xpert Vision

November 2023 — February 2024

Started my career as a Laravel Developer at Xpert Vision, building and maintaining web applications. Worked on backend development, API integrations, and database optimization.

Full Stack Developer at Freelancer

June 2022 — Present

Developed custom web applications using Laravel, MERN stack, and Django, handling both frontend and backend. Designed and optimized databases, implemented secure authentication, and built interactive user interfaces.

Education

Matriculation, The Smart School

March 2012 — March 2022

Completed matric with an A+ grade in Computer Science, building a strong foundation in programming and technology.

Intermediate, Govt. National College

March 2022 — March 2024

Achieved an A grade in Computer Science, further enhancing my knowledge of coding, algorithms, and problem-solving.

Bachelors, UBIT, University of Karachi

December 2024 — Present

Currently pursuing a Bachelor's in Computer Science at UBIT, focusing on software development and AI.

✦ Courses & Certifications

Certified Software Engineer, Aptech

June 2022 — June 2025

Azure AI Engineer Associate, Microsoft

January 2025 — Present

CS50: Computer Science for Artificial Intelligence, Harvard University

February 2025 — Present

★ Projects

Monkey Beanies

November 2024 — February 2025

Built with Laravel and React, this advanced eCommerce platform supports dynamic pricing, multi-currency, reseller rates, and custom embroidery options. It features real-time delivery pricing, secure payments (PayPal, Stripe, Authorize.net), live chat, file management, multilingual support, automated discounts, a tax system, and profit-loss calculation.

Metro CRM

October 2024 — December 2024

Developed a CRM system using Laravel, featuring task management, Kanban boards, and a real-time chat system. Designed multiple portals for customers, vendors, employees, admins, and super admins, ensuring role-based access. Integrated a case creation system with status tracking, along with various automation tools for seamless workflow management. Optimized for efficiency, scalability, and user-friendly navigation.

Ecommerce

March 2025 — Present

Built a powerful eCommerce platform in Laravel, combining online store functionality with ERP and POS integration. Features include dynamic product variations, discount systems, tax management, invoicing, and HRMS. Supports multi-channel sales tracking, real-time profit & loss analysis, and a case management system for efficient operations. Optimized for scalability, automation, and seamless business management.

★ Experience

Real-Time Communication

Implemented chat sockets and live messaging for seamless real-time interactions.

Payment Integration

Integrated Stripe, PayPal, Authorize.Net, and other gateways for secure transactions.

E-Commerce Development

Developed scalable online stores with POS, ERP, dynamic product variations, tax management, and discount systems.

CRM & Business Solutions

Built multi-portal CRMs with task management, case tracking, Kanban boards, and automated workflows.

Backend & API Development

Designed scalable RESTful APIs, authentication systems, and database architectures for high-performance applications.

Scalable Backend Architecture

Developed high-performance RESTful APIs, authentication systems, and complex database designs ensuring security, efficiency, and scalability.
