Syed Sabeer

Passionate Software Engineer with 2+ years of experience building scalable applications. Skilled in Data Structures, Algorithms, software architecture, SOLID principles, and design patterns. Proven track record in leading complex projects using microservices and modern tech stacks. Certified by top institutions, combining strong theoretical and practical expertise.

Work Experience

Full Stack Developer, SuperSoft Technologies, Karachi
June 2024 - Present
- Built and led full-stack projects using React, Bootstrap, and Laravel, with real-time features powered by Node.js microservices. Followed clean code, software architecture, and design patterns. Acted as team lead and software architect, managing DevOps tasks across AWS, Azure, and Linux-based VPS environments.

Laravel Junior/Internee, Xpert Solutions, Karachi
December 2023 - June 2024
- Worked on backend development using Laravel, assisting in building and maintaining web applications. Gained hands-on experience with MVC architecture, RESTful APIs, and database management.

Full Stack Developer, Freelancer
Feb 2020 - Jan 2021
- Delivered end-to-end web solutions as a freelance full stack developer using modern tech. Built responsive apps, optimized performance, and ensured clean, maintainable code.

Educational Background

Bachelor of Science in Computer Science
UBIT, University Of Karachi
Dec 2024 - Present
- Studying with a CGPA of 3+ also recognized as a high-performing student throughout the program.

Projects

Enterprise Resource Planning (ERP)
- Developed a feature-rich ERP solution with modules for payroll, inventory, POS, FBR POS integration, HRM, accounting, sales, quotations, expenses, and purchase orders. Designed for scalability and smooth cross-department operations with clean architecture and automation.

MCM (CRM)
- Developed a multi-portal CRM with case management, real-time logs, status tracking, and role-based access for admin, customers, employees, and vendors. Integrated Socket.io for live chat, notifications, and a robust email system to ensure seamless communication and supervision.

CapBeast (Ecommerce Store with Advance Features and CRM)
- Developed a custom e-commerce platform with product customization, payment gateways (PayPal, Stripe, Authorize.net), abandoned cart recovery, campaign tools, CRM, HRM, volume discounts, and advanced order handling—delivering a complete and scalable shopping experience.
